### 3. Monetization Models

We propose the following software monetization models for making our system sustainable:

#### **(A) License**

##### **1) One-Time Licensing Fee:**

Charge clients an upfront fee for the development and deployment of the platform. This fee would cover the initial setup, customizations, and delivery of a fully functional system tailored to the client's requirements.

- **Example:** RM 30,000 for a complete platform. This fee ensures fair compensation for the initial effort involved in creating and deploying the system.

##### **2) Subscription-Based Licensing Model:**

Alternatively, I could offer the system on a subscription basis. Clients would pay a recurring monthly or annual fee to use the platform.

- **Example:** RM 3,888 per year for continued access to the system. This model provides a steady, predictable revenue stream and supports long-term sustainability.

#### **(B) Freemium**

A freemium model could be implemented for clients who want to test the platform before committing. Basic features of the system, such as booking functionality, limited treatment packages, and essential customer support, could be offered for free.

##### **1) Free Tier:**

- The free version of the platform offers essential but limited features. Clients are able to try out the limited features to explore the basic features provided without paying any costs.
- Freemium:
  - Limitation Examples:

- Maximum number of package creations is 5.
- Maximum number of order creation is 100.
- Maximum number of appointment creation is 300 without appointment type selection.
- Services of each treatment for a package cannot be arranged separately and membership and referral modules cannot be accessed.
- Stripe and Meow-Wallet payment methods are not available, clients can only make payment in physical stores.

## 2) Premium Features:

- Clients who want to access advanced features provided by the web application are required to subscribe to the premium packages. There are 2 available premium packages which are Premium and Premium Plus.
- Premium:
  - Price: RM 388 per month
  - Unlocked Features Examples:
    - The maximum number of order creation per month is 600.
    - Membership and referral modules can be accessed.
    - The maximum number of package creations is 20.
    - All types of appointment can be created with a limitation of 2000 appointments per month.
    - Inbox message list is accessible without email notification.
    - Stripe and Meow-Wallet payment methods are available.
- Premium Plus:
  - Price: RM 500 per month
  - Unlocked Features Examples:
    - All features are unlocked without limitation
    - Package can be created with customization of sequence arrangement of treatment services
    - Collaboration between inbox message email notification.
    - Appointments are provided with barcode scanner and auto-generator for easier appointment handling.
    - All packages are provided with auto-generated QR code.

## (D) Support

- After deploying the system, clients often require ongoing technical support, software updates, and feature enhancements. These services can be offered as part of a maintenance package.

- **Basic Support Plan:** For clients who require minimal assistance, the basic support plan costs RM500 per month. This plan includes access to regular system updates, troubleshooting assistance, and email support. It is suitable for clients who do not need extensive customization but still require occasional technical support.
  - **Premium Support Plan:** For clients with more complex needs, the premium support plan is priced at RM1,500 per month. This package includes 24/7 customer support, priority issue resolution, tailored system updates, and access to feature requests. The premium plan provides clients with enhanced service levels, ensuring the platform's optimal performance and the ability to address urgent needs quickly.
- This approach not only generates recurring income but also strengthens the client-developer relationship.
